1000 Skopje

SOCIAL DINNER FOR CARBONICA PARTNERS

- The social dinner meeting will take place on Wednesday, 17 April 2024

Time and location will be additionally determined

CITY OF SKOPJE

Skopje is the capital and largest city in North Macedonia, which is also an administrative, political, economic, cultural, educational and scientific centre.

During its existence, the city of Skopje was named by different names depending on the historical occasions. The ancient name is Scupi (latin) which indicates its longevity.

We love it so much, we wanted to share our 5 reasons to visit Skopje:

- It has a long history rich with customs and traditions. Archaeological evidence shows that civilisations flourished in North Macedonia as early as 7000 years BC. It has an unusual collection of monuments, interestingly, Skopje is known as the 'city of statues'. A massive earthquake destroyed most of the city's historic monuments in 1963 (in fact, about 80% of the city was destroyed). Some 40 years later, the government embarked on a project to 'repopulate' the city with statues. The result is a largely wonderful collection of statues, which visitors like.
- Most notably, you can explore unique Skopje attractions, including its Old Bazaar, Fortress

Kale and Stone Bridge without breaking the bank. If you ever needed an excuse to visit Skopje, it is socially the cheapest city in Europe. When Wanderu published their research around the cheapest cities to visit in Europe, Skopje was in the number one spot.

- Traditional Macedonian dishes are generous and deliciously rustic, with Mediterranean, Balkan and Middle Eastern influences. Think grilled meat, fresh fruit and vegetables, stuffed peppers, moussaka and pot-baked beans. The local food is therefore rich and hearty. And Skopje has a wonderful selection of kafanas (traditional Macedonian restaurants) where you can sample it.
- Beyond Skopje's fabulous food, you'll be seduced by its flourishing wine scene. Did you know locals have been growing grapes in this part of the world since the 13th century BC? The country's Mediterranean climate (with 270 sunny days per year) combined with a rich terroir lends itself to full-bodied, fruity red wines, none more famous than Macedonia's deep-red, almost black, Vranec.
- Everything that we mentioned above, and much more, can be seen with an organised walk with a professional guide.
